

## Hamot Second Century Fund

*Where your gifts touch lives.*

### The Hamot Fund

Our donors often ask, “Where is my gift most needed?” The answer is *The Hamot Fund*.

Every charitable gift to Hamot is a special gift to our patients and to the community. Many of our donors prefer the flexibility of being able to direct their gifts toward any program at Hamot Medical Center, from direct patient care to state-of-the-art equipment and technology to education and research. Their generosity and support make a difference. A growing number of our donors, however, are discovering a special satisfaction that comes in knowing their unrestricted gifts to The Hamot Fund provide a wide array of opportunity to support the most urgent needs of our patients.

By directing your gift to The Hamot Fund, you can take comfort in knowing that your contribution will touch the lives of more than one infant, more than one child, more than one patient. From maternity to cardiac care, from trauma to neurology and neuroscience, from orthopaedics to pediatrics - giving to The Hamot Fund is a way for a single gift to have a tremendous impact by reaching out to all patients, of all ages, through all areas of care.

Dollars in The Hamot Fund are used to subsidize a wide range of facility and equipment upgrades, community projects, education programs, gift-matching opportunities and other improvements to the quality of care we deliver to patients. Because many of the projects and programs supported by The Hamot Fund are also partially funded by capital and operating budgets, donors to The Hamot Fund enjoy the unique opportunity for one gift to actually support a great number of patient care programs, projects and medical innovations.
