

Hamot Second Century Fund

Where your gifts touch lives.

Hamot Heritage Society

The Hamot Heritage Society recognizes those donors who provide for the future of Hamot through planned gifts. Such gifts involve estate assets and usually include legal documents such as will or trust agreements. They can be made during life or deferred until a later time. They can be used to create endowments or to provide funds for buildings or operational needs.

By including Hamot in their estate plans, Heritage Society members set in motion a chord that resonates with tradition. For more than 120 years, people from varied walks of life have sounded a common theme of providing for the future of healthcare excellence with their planned gifts to Hamot.

For some it is to further the profession to which they have devoted their lifetime; for others it is to ensure that the levels of care they have received as patients will be available for future generations; for others it serves as a way to perpetuate their philanthropic values. For all, it is a way to create a legacy of healing for which they will not only be honored but also remembered - as members of the Hamot Heritage Society.

Members of the Hamot Heritage Society receive an invitation to the annual Hamot Heritage Society recognition ceremony, exclusive invitations to educational seminars, tours and opening receptions, up-to-date news on Hamot projects, and recognition as Heritage Society members in Hamot's Honor Roll of Donors. A beautifully-crafted ceramic apple tree is on display in the main lobby of Hamot Medical Center. All Heritage Society members are eligible to have their names engraved on one of the tree's leaves.
